

Annual Breast Cancer Updates 2022 (29 October 2022) Closing Speech by Dr. Chun-Chung Yau

Honorable speakers, colleagues and friends

We have heard from our distinguished speakers and panelists the latest update of breast cancer research. The discussion that follows give us into how we could translate the research results into on our clinical practice.

Thank you all for your participation from online to physically joining us, and the experts from local and overseas. You will agree with me that there are many take home messages that impact on our patient care.

This fruitful programme will not be possible without the support from our sponsors and supporting organisations.

They are Diamond sponsor: Daiichi-Sankyo and AstraZeneca, Platinum sponsors MSD, NOVARTIS, Gold sponsor CANbridge, Silver sponsors: Eisai, Eli Lilly, Jacobson, Pfizer, and Roche. And Supporting organisations: Hong Kong Breast Oncology Group, Hong Kong Society of Breast Surgeons, and Hong Kong Cancer Therapy Society.

Last but not the least, I would like to extend our gratitude to HKBCF's executive team, under the leadership of CEO Ms. Connie Lau, for the smooth management of the event.

Thank you again for your participation and I look forward to seeing you all next year.
