

1 December 2014

“The Role of Breast Cancer Registries in Cancer Prevention and Control” Symposium

The JC School of Public Health and Primary Care (JCSPHPC) of The Chinese University of Hong Kong (CUHK) and the Hong Kong Breast Cancer Foundation (HKBCF) co-hosted a symposium on **The Role of Breast Cancer Registries in Cancer Prevention and Control** on 1 December 2014.

Breast Cancer Registries are increasingly recognized as effective surveillance tools, the data from which may help prevent and control breast cancer in entire populations. This symposium featured experience sharing from two breast cancer registries, one in Sweden and one in Hong Kong, and aimed to generate discussion within the medical and public health community regarding the role and importance of cancer registries.

At the symposium, Dr. Polly Cheung, Founder of the Hong Kong Breast Cancer Foundation, and Professor Kerstin Sandelin of the Karolinska Institutet in Sweden shared their experience of Hong Kong Breast Cancer Registry (HKBCR) and Swedish National Breast Cancer Quality Register. There were 98 attendees, including Prof. Sophia Chan, Under Secretary for Food and Health Bureau, representatives from the Hospital Authority, Legislator, District Councilor, HKBCR Donors, HKBCF Council Members, HKBCR Steering Committee Members, HKBCR Investigators, representatives from non-government organizations, and other doctors and nurses.

Prof. Sophia Chan, JP, Under Secretary for Food and Health Bureau, giving a welcoming address

Dr. Polly Cheung sharing the history and findings of the HKBCR

Prof. Kerstin Sandelin delivering the presentation on her experience and insights of the Swedish National Breast Cancer Quality Register

(from left to right) Dr. Cheung and Prof. Sandelin answering guests' questions
